Arkansas Fire & Police Pension Review Board  
620 West Third  
Suite 200  
Little Rock, AR 72201

Ladies and Gentlemen:

We have completed the actuarial valuations of the 41 Fire and Police Pension Funds as of December 31, 2022. This report contains summary information from those valuations, as well as comparable information from the December 31, 2019, 2020 and 2021 valuations.

The following table shows the progress of the funds over the last several years:

	<u>12/31/2019</u>	<u>12/31/2020</u>	<u>12/31/2021</u>	<u>12/31/2021</u>
Plans Valued	65	60	51	41
Number of Active Members	12	10	4	3
Number on DROP	1	0	0	0
Number of Recipients cover	1,054	867	767	665
Assets	116,136,560	106,327,323	104,946,588	99,791,943
Unfunded Actuarial Accrued Liability	47,368,430	36,463,669	35,363,920	39,133,205
Market Value of Assets	124,919,966	116,783,006	118,860,273	95,260,282
Unfunded AL on Market Value	38,585,023	26,007,986	21,450,235	43,664,866
Percent of Liability Funded:				
Police	80%	81%	84%	82%
Full Paid Fire	59%	62%	61%	58%
Volunteer & Part-Paid Fire	96%	101%	102%	99%
Reported Employer Contribution as a Percent of Actuarially Determined Contributions				
Police	58%	56%	61%	67%
Full Paid Fire	51%	54%	54%	51%
Volunteer & Part-Paid Fire	128%	148%	148%	151%

## **FORMAT OF REPORT**

Following this cover letter, our report contains the following exhibits:

- EXHIBIT 1 – Summarizes various information as of December 31, 2022, broken out by Police, Full Paid Fire, and Volunteer Fire.
- EXHIBIT 2 – Compares the December 31, 2022 valuation results with those of December 31, 2021, 2020 and 2019.
- EXHIBIT 3 – Develops a "funded status" and summarizes information for each "funded status".
- EXHIBIT 4 – Summarizes the number of plans by various funding criteria.
- EXHIBIT 5 – Summary of the Rates of Return.
- EXHIBIT 6 – Lists certain financial information and risk indicators for the plans valued December 31, 2022.

## **VALUATION REPORT CHANGES**

There were no major changes in methodology or presentation in the valuation reports this year. We continue to present the required GASB disclosures for all plans as appendices to the valuation report. We accommodated several requests for expedited valuations and additional audit information for locations which file GASB-compliant audits. All valuation reports were completed and submitted to the PRB by the end of May.

## **INVESTMENT RETURNS**

The PRB decided to return to a single valuation discount rate beginning with the 2013 valuations. That single discount rate is 5%. Due to the market in 2022, none of the 41 plans exceeded the valuation rate of 5% in 2022 on a market value basis. However, as usual, there was significant variance between plans: the returns ranged from about 2% (only two plans had positive returns) and -20%. The market value weighted average return for 2022 was -13.1%

Exhibit 5 shows the 2022 (market value) investment returns as well as the five year and ten year average returns. In general, the smallest plans had the worst history of investment earnings and some did not have professional investment advice. If plans do not achieve a long term average investment return of 5% or more, the ultimate cost of the plan will be greater than the value of the liabilities shown in the valuation report. We noted this information in the valuation reports at the end of the Exhibit 3 financial reports as well as included it as one of the plan's risk indicators.

## **OUTLOOK FOR INSOLVENT PLANS**

Exhibit 6 lists some financial and actuarial information for each plan. We have disclosed both the Valuation Assets and the Market Value of Assets. One can see in detail the large number of plans in Status D and below, as well as the amount of unfunded liability associated with those plans. This is an area we have discussed with the Board in detail. This deserves continued attention as over 75% of the total liability is associated with plans with a status of D or lower. Beginning with the 2014 Summary Report, we aligned the projected years before assets are depleted (crossover point) with the status definitions discussed above. Therefore, all status E plans will show “10-20 years,” that is, indicated for At Risk designation. There are five (up from one last year) plans with Status E. Status F plans will show “Less than 10 years,” that is, indicated for Projected Insolvent designation. The status D plans all show “20+ years,” although there are varying levels of funding risk within that category.

Rogers Fire met the criteria for inclusion as a Projected Insolvent plans under ACA §24-11-208: The Board should consider their inclusion. Batesville Fire (who recently added a millage) and Fayetteville Fire passed the cash flow test, but with such a low funded percentage they could easily return to Projected Insolvent status. Marion Fire has consolidated this past year. These two plans bear continued monitoring, but we have provided them with good information to help solve their issues.

## **DATA RECEIVED FROM PLANS**

The results of these valuations are based on the financial and participant data supplied by each plan through the PRB staff. We did not audit this data, although we did review it for reasonableness and consistency.

If you have any questions or comments, please feel free to contact us.

Sincerely,

Jody Carreiro, ASA, MAAA, FCA, EA

#### Summary by Funding Status

This exhibit gives a summary of certain plan information classified by a funding status which is based on standards of actuarial soundness. Funding Status is defined here for use by the board in understanding the risks facing the various plans. We changed definitions for status D and below beginning with the December 31, 2015 report.

The Board has adopted a definition of actuarial soundness, which is based on two tests:

1. Contribution Test: The actual contributions for the previous year exceeded the actuarially calculated contribution (fully funded in five years).
2. Ratio Tests: The assets allocated to cover accrued actuarial liabilities for active participants (i.e. the "short condition test" for category (3)) must be greater than 100% OR the "funded percentage" (total assets divided by total Actuarial Accrued Liabilities) must be at least 97%.

In order to further evaluate potential funding risks, we have assigned a "Funding Status" to each plan. The "Funding Status" for each plan is determined as follows:

- A. (Fully Funded) The calculated contribution amount is \$0. A plan in this classification should remain adequately funded even with no further contributions.
- B. (Actuarially Sound) A plan in this classification meets both the contribution test and the ratio test of the definition of actuarial soundness. These plans meet the Boards' definition of actuarial soundness.
- C. (On Track) The plans in this classification pass the contribution test, but do NOT pass the ratio tests, which are defined above. A plan in this classification should *eventually* meet both standards of actuarial soundness.
- D. (Not Actuarially Sound) The plans in this category did NOT pass the contribution test. (They may or may not have passed the ratio tests.) These plans will likely require more contributions in order to pay promised benefits.
- E. (At Risk) These plans are projected to deplete their assets in the next *ten to twenty years*. The initial risk indicator suggests that these plans should be considered for the At Risk designation.
- F. (Projected Insolvent) These plans are projected to deplete their assets in the *next ten years*. The initial risk indicator suggests that these plans should be considered for the Projected Insolvent designation.

The Board Rule which defines actuarial soundness has an alternative definition for some plans. The plan may prove actuarial soundness through a cash flow or alternate cash flow study defined in the Rule. These statuses are based on the initial risk indicator and do not reflect any of these cash flow studies.

#### Selected Financial Information by Plan

This exhibit contains selected financial and actuarial information for each plan that reported for December 31, 2022. The mixed fire plans are shown as one plan on a single line.

The information shown in this exhibit:

- (1) City or fire protection district.
- (2) Type of plan - i.e., police officers, full-paid firefighters, volunteer/part paid firefighters, or a mixed plan covering both volunteers and full-paid firefighters.
- (3) Assets. We have shown both the Valuation Assets and the Market Value of Assets.
- (4) Unfunded Actuarial Accrued Liability, which is based on the Valuation Assets.
- (5) Number of individuals included. This number includes active members as well as retirees, beneficiaries, and participants on DROP.
- (6) Actuarially Computed Contribution. This is the calculated contribution amount from each valuation report.
- (7) Actual 2022 Contribution. These are the actual amounts contributed by the city from its sources; generally: millage, premium tax, employer match, and percentage of fines, for police plans.
- (8) Funded Status. See Exhibit 3 for a complete description of the six "grades".
- (9) Projected Years until all Assets Depleted. Based on the projection used to determine whether a "crossover point" exists for GASB purposes. This is the number of years until the plan depletes its assets. These categories are related to the Funded Status and are used to identify plans which may need further attention.
- (10) Risk Indicators. These four indicators are included in the cover letters of the valuation reports. They range from 1 (least risk) to 5 (most risk); in order, a, b, c, and d correspond to: funding percentage risk, market-return risk, contribution risk, and future crossover risk, respectively.

Risk Level	Funded Percentage	10-year Market Rate of Return	Contribution Actual/Recommend	Crossover Point
5	<60%	<3%	<25%	<10 yrs.
4	60%-75%	3%-4%	25%-50%	10-20 yrs.
